

233-400 Fliptop Manual - Roof system for lengths up to 6m

Fliptop Manual is our manual system, which opens from one side and uncovers it for loading. Fliptop Manual Maneuvers with a lever in the front or back depending on demand and space.

Ends and the longitudinal tube are made of galvanized steel. All moveable tubes and linkage in the ends are manufactured in aluminum to save weight and make the roof easier to open. The opening lever has a position lock when opened and closed. A draw wire is connected to the lock that automatically opens when the wire is charged. All the fulcrums is stored with bearing bushes.
