

800-(005/006) Fliptop Multi Pneumatic - Roof systems for lengths up to 9m

Fliptop Multi Pneumatic is our system that opens from the middle to the sides, the opening is done by a pneumatic cylinder, mounted in the front or back. Long systems have cylinder in both ends. Cylinders and flow control valves are included in the system, but the control valves are excluded. Valves for control are ordered separately, we have a number of different alternatives, and most common is 5/3 manual with closed center. We also provide complete maneuver systems with remote control and receiver. The system is galvanized and all the fulcrums are stored with bearing bushes.
